Explanation of any special or additional features you added, if any.
→ In the Main.java when checking inventory you can see even the registered users, as I had it enabled for debugging it was very useful to see exactly which people had what pets.
→ Checkout was also fully incorporated and works like a charm.
→ Small things like null checks where also done to make sure everything is working.

If your solution to this problem is incomplete, you may explain the status of your submission and describe any issues that kept you from completing the assignment.
→ All completed + more features.

Discuss the easy and challenging parts of the assignment. How did you overcome all or some of the challenges?
→ Easy part was Part A - B, the hard part came when wanting to finish the switch statements + find out the one problem I had with PremiumMembers returning Null even though getName() was properly returning a name.

Did you learn anything that will help you perform better on future assignments?
→ Of course, I learned that when working on this project debug console statements are key to understanding if your code is working as intended.
